DETAILED ACTION

Allowable Subject Matter

1. Claims 1-24 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. Stewart, USPN 6,414,635, discloses a wireless (see column 1, lines 8-14) communication system that are inherently implemented on computer readable media in which a connection request by a PCD (the user's mobile terminal) to a wireless AP (the access point), including identification information (see column 8, lines 9-23). The PCD may provide its location to the network, and the multiple access points are deployed according to location (and their location of the AP's are inherently associated with their identities). The PCD may provide its location as determined from a GPS. Since the PCD may access any AP, the PCD and AP must be otherwise unassociated (see column 7, lines 20-41). Services may be made available to the user based upon the location relative to the location of the AP (see column 12, lines 41-61). Since the AP being accessed is not the access terminal, the PCD and AP are unassociated. Stewart does not however use this location to verify the user, but rather to perform direct marketing. Other references were found that verify a user based on location, but none in which the mobile terminal and access terminal are completely unassociated. It would not have been obvious for one of ordinary skill in the art to verify the user of Stewart based on location since there is no motivation found in the reference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
